As the monsoon arrival was very early this year, there is still a month to go for the normal dates of the arrival of the southwest monsoons to the Guar growing region of India.

The market is still trading flat. A lot depends on how fast the USA and other countries reach some sort of understanding on their trade agreements and how fast the International trade can return to normal.

The demand from the food and oil drilling sectors is spread out with no spike in the demand pattern but there has definitely been a gradual overall increase.

Container availability has again become difficult. Sailings have become more and more erratic. In view of the delays in shipments we suggest to plan your purchases and shipment well in advance and with enough safety margin.

Nothing can be forecasted about the Guar market for sure. The market is controlled by speculators/traders.

We will keep you updated regarding the market situation as it develops. Please advise us your requirements so that we can calculate and advise you our best rates based on your indication regarding the Quantity, Quality and shipment period. Any queries or inputs required, please feel free to contact us. We will try to suggest the best options based on our experience and the prevailing market situation.
