Guar Crop Data (All figures in Hectares)

State	Average Area (no of years)	Area in 2025	Target	Sowing till date	Date of update
Rajasthan	2,747,000 (5yrs)	2,482,000	2,550,000	982,350	09/07/2026
Gujarat	87,881 (3 yrs)	73,794	87,881	963	06/07/2026

* Statistical data of two other Guar growing states of Punjab and Haryana are not available

As advised there is some sowing but it is mainly in areas which have access to irrigation water in extreme North West Rajasthan and Gujarat. With rains reported in many areas the farmers have started sowing.

The monsoons have covered the entire country. However the rains have not been sufficient to commence sowing in the Western parts of Rajasthan. The Northern parts of Rajasthan have received good rains and the sowing is all but complete.

There are some forecasts which are predicting very poor rains for the Guar region. The speculators and traders have taken the rates up to Rs.125/Kg for the Guar split, an almost 9% increase over the last weeks prices during the week.

The demand from the food and oil drilling sectors is spread out till now, with no spike in the demand pattern.

Shipments from India to almost all sectors have been effected as vessels of all shipping lines are unable to meet their schedules. One can expect some delays in the sailing and the delivery times as shipping lines are still working on the sailing plans which were disrupted due to the war. The inventory situation also is very poor as container availability is restricted.

Nothing can be forecasted about the Guar market for sure. The market is controlled by speculators/traders.

We will keep you updated regarding the market situation as it develops.
